SPOT GEN4 BUTTONS / S.O.S. BUTTON TESTING INSTRUCTIONS

SAVED BY SPOT™

Following these instructions will ensure the S.O.S. button as well as the other buttons on your SPOT Gen4 are operating properly.

There are four important requirements that need to be followed prior to testing the buttons/LED lights:

a. Perform button test inside a building in case S.O.S. is accidentally activated when pressing the buttons.

b. Ensure SPOT Gen4 has fresh Energizer Ultimate Lithium batteries.

c. Ensure the unit is turned off.

d. Read through the button test steps prior to starting the test.

To test the buttons/LEDS on your device, follow the steps below:

NOTE: Once the HELP and S.O.S. LEDs turn green, you will have approximately 5 seconds to complete step 2 and another 5 seconds to complete step 3. Otherwise, the test sequence will time out and you will have to start over.

1. Press & hold the **TRACK button** followed by the **POWER button**. Hold for approximately 3 seconds. The HELP and S.O.S. LEDs should turn **green**.

2. Press & hold the **S.O.S.** and **HELP buttons** at the same time. All LEDs should turn **red**.

3. Press & hold the **CUSTOM MESSAGE** and **CHECK IN buttons** at the same time. All LEDs should turn **green**.

4. After you complete the buttons/LED test, go outside & send a Check In message.
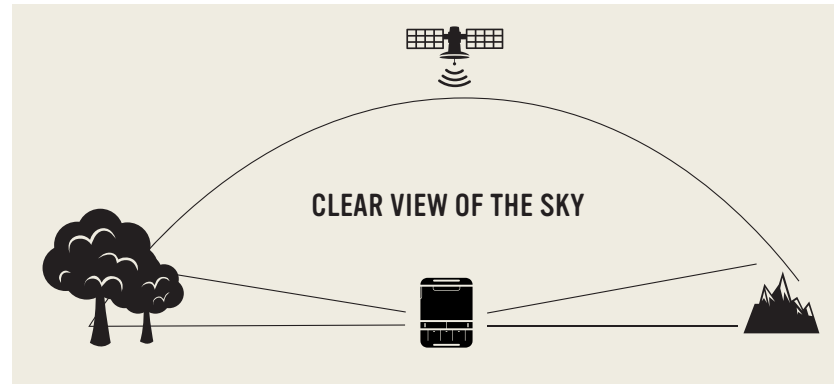

STEP 1

Press Track first, then Power.

Power

2

Track
