We, the undersigned manufacturer, declare that the following products have equivalent performance with respect to regulatory compliance for Radio Spectrum, EMC and Safety.

REGULATORY MODEL NUMBER	PRODUCT NAME
GSP-1700	SPOT Global Phone
	Globalstar GSP-1700 Satellite Phone

- The only difference between the products is that the SPOT Global Phone includes a custom plastic faceplate (0.010 inches thick) on top of the original GSP-1700 Satellite Phone faceplate. This modification is deemed insignificant with respect to regulated characteristics, and the qualification and certification tests of the phone.
- EMC testing in accordance to EN 301 489-1 V1.9.2 & EN 301 489-20 V1.2.1 was carried out to demonstrate conformity with the latest harmonized standard.
- These products share a Regulatory Model Number which stays with the regulatory aspects of the design. The Regulatory Model Number is the main product identifier in the regulatory documentation and test reports. This number should not be confused with the Marketing Product Name.

The technical compliance information and the justification for compliance with the essential requirements are contained in the GSP-1700 Technical Construction File (TCF) issued under TCF No. 80-C6456-1. This includes the TCF originally submitted for the GSP-1700, BABT reference NC12900 i01, as well as the additional tests and Notified Body Opinion associated with the evaluation of the SPOT Global Phone.
